CETA Composite Decking

Product made from a unique blend of HDPE wood fiber and other proprietary components are an elegant, cost effective, durable and safe alternative to wood for both residential and commercial outdoor recreational areas. The life span of wood is limited when exposed to moisture and insect damage. Wooden decks require chemical treatments to maintain appearance and structural integrity. Screw heads pop out over time and required maintenance generates extra cost and takes time away from your fun and relaxation. In addition, the safety of wooden structures can put friends and family at risk with splintered or slippery surfaces.

Composite Decking

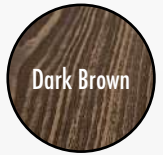

Premium Composite Decking Board

Premium Composite Decking is revolutionising outdoor living spaces. Blending the natural charm of wood with the robustness of synthetic materials, it's quickly becoming a top choice for home-owners and builders alike.

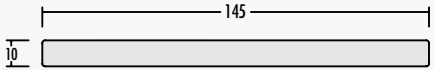

CETA Premium Composite Decking provides construction materials that are low-maintenance, rot proof, and resistant to all weather conditions. This unique composite material also creates safe anti-slip, splinter-free structures perfect for any outdoor environment. Composite decking is ideal for the value conscious consumer who also wants a luxurious product with timeless appeal.

Premium Composite Decking Bull Nose Board

Finish the exposed edges of your decking with the Ceta Premium Woodgrain Composite Decking Edging Board. Designed for use with Ceta Premium Series decking boards, it provides a neat, coordinated finish around the perimeter of your deck.

This product is an edging finish and is not designed to be used on its own as a decking board. It should be installed alongside the compatible Ceta Premium Series deck boards.

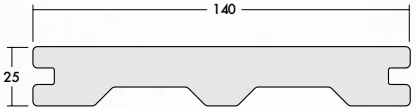

The realistic woodgrain-effect surface matches the Premium Series range, while the durable composite material resists rot, splitting and insect damage. It does not require regular painting, staining or sealing.

straight joist connector

Ultimate decking support solution

Simple design – rapid installation

Compatible with all Ceta pedastals

Supports any type of conventional decking boards – softwood, hardwood, composite, PVC

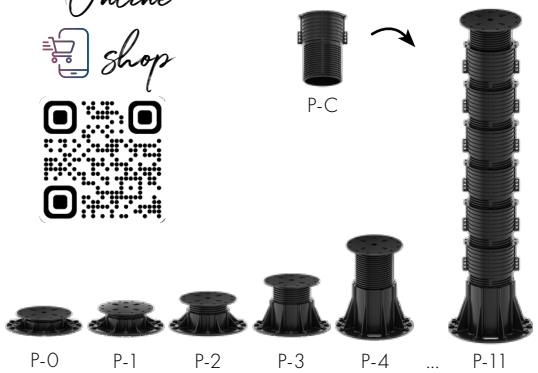

No rotting

Plastic Pedestals

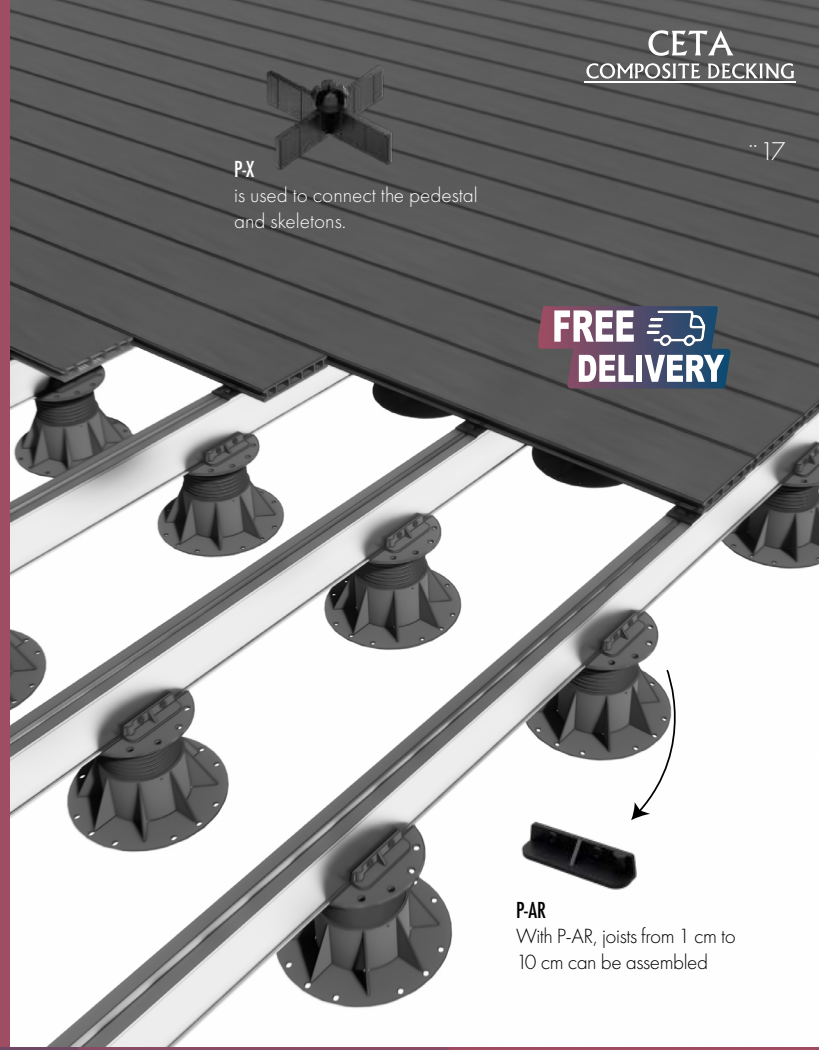

Pedestals are designed to reach the desired final elevation and eliminate the difference in slope. Their purpose is to enable making the last layer of flooring without using protective alum on the insulation.

These pedestals also aim to provide a continuous drainage system through the open joint gaps of the flooring. Adjustable plastic flooring pedestals offer a system that can be intervened under potential insulation problems. They are also quite durable with a carrying capacity of 900 kg.

CETA Plastic T-Clips & Stainless Steel Screws

CETA Composite Decking Plastic T-clips for Premium and Deluxe Series Composite Decking Boards.

Ceta Plastic T-Clips and stainless steel screws have been designed to fit between Ceta Composite Decking Boards for a strong and effective installation, leaving just a 6mm gap for expansion. T-Clips are corrosion-resistant, long-lasting and supplied.

Pack of 100,

Black painted small head stainless steel screw included.

We recommend 10 pcs of t-clips for every 3.6m of Composite Decking Board.

CETA Starter Clips & Stainless Steel Screws

CETA Composite Decking Starter Clips for Premium and Deluxe Series Composite Decking Boards.

The ability to fit your composite decking project correctly from the beginning is a must. Ceta Starter Clips will help to avoid any unnecessary changes during the installation process.

Made from precision-cut stainless steel. Having increased corrosion and wear resistant properties, our Composite Decking Starter Clips will last the lifetime of your decking project to give added peace of mind.

Pack of 25,

Black painted small head stainless steel screw included.

CETA Metal Clips & Stainless Steel Screws

CETA Stainless Steel Clips secure tightly and easily into Ceta Composite Decking Boards for a hidden connection between boards.

Our Stainless Steel Clips and Screws (3x32mm) fit within the grooves of Ceta Composite Decking Boards for increased wear and corrosion resistance.

We advise connecting 10 clips for every 3.6m of Ceta Composite Decking Board.

Pack of 50,

Black painted small head stainless steel screw included.

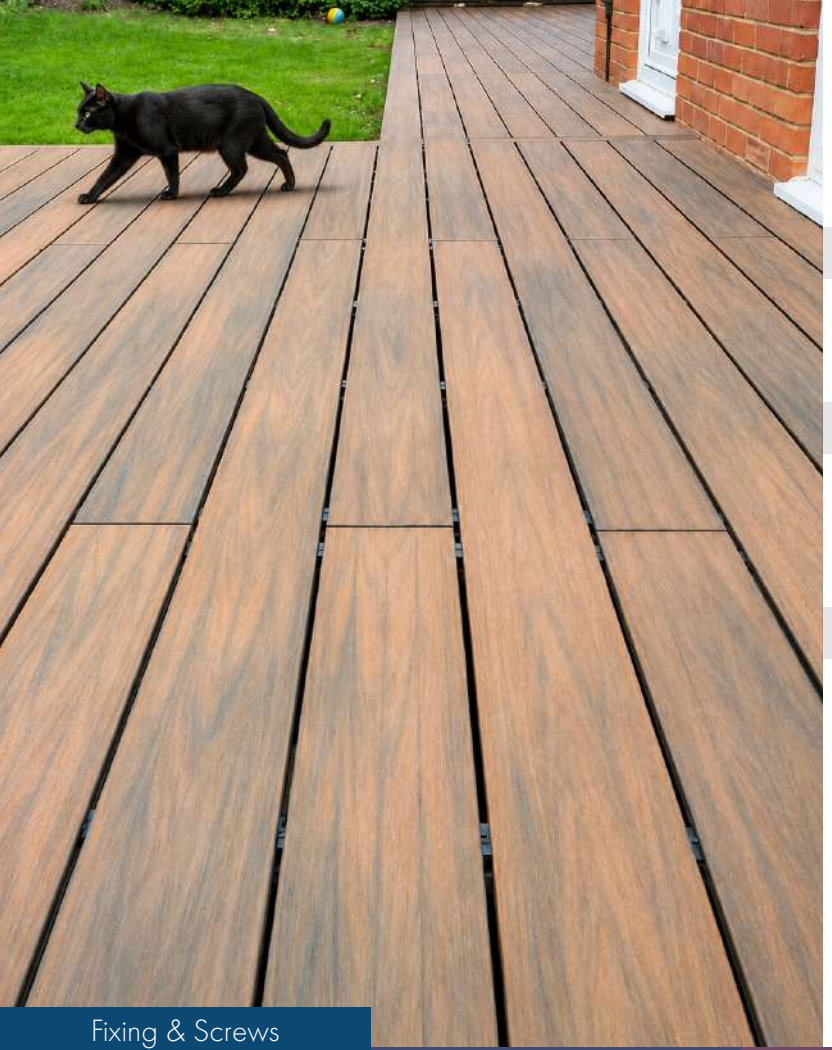

Ceta Protection Tape

Completely protect and seal your new or existing deck frame or timber structure with Ceta Protection Deck Tape. Protected from water/moisture rot and frame weathering. By simply applying a strip along the top of your wooden joists as a 'cap' (rather than a wrap) protects the timber as it creates a strong seal from any moisture. 50mm wide, 65mm wide size options available.
